

Serie 6RXSP

Electrobombas sumergibles para pozos de 6" de diámetro, construidas totalmente en acero inoxidable AISI 304 o AISI 316.

Alcanzan óptimos rendimientos hidráulicos. Son de máxima resistencia a la abrasión y corrosión.

Especificaciones Técnicas

- Caudal: hasta 78 m³/h.
- Altura de elevación: hasta 430 m.
- El líquido bombeado debe ser limpio y estar libre de sustancias abrasivas, compatible con los componentes y materiales de la bomba.
- Su diseño de vanguardia y tecnología de avanzada permiten alcanzar óptimos rendimientos hidráulicos y eléctricos.
- El cuerpo hidráulico es totalmente de acero inoxidable AISI 304.
- Por su robustez, tienen una larga vida útil de trabajo duro y continuo.
- Son altamente eficientes gracias a sus estrictos estándares y a sus características constructivas.
- Cuentan con válvula de retención de acero inoxidable.
- Máxima temperatura del líquido: 30°C.
- Máxima presencia de arena: 50 g/m³.
- Boca de salida roscada de Ø 2½", 3" y 4" según el modelo.
- Equipadas con motores de 1,5 a 60 HP, de 4" y 6" en arranque directo o estrella-triángulo.

Materiales

- Con cuerpo hidráulico totalmente de acero inoxidable AISI 304: impulsores, difusores, carcasa exterior, cuerpos de aspiración y descarga, y fleje de protección.
- Eje de acero inoxidable pulido AISI 431.
- Boca de descarga de acero inoxidable con válvula de retención para una fácil instalación y una mayor durabilidad.
- Cojinete axial de NBR que asegura una baja fricción y una alta resistencia.
- Rejilla de succión de acero inoxidable que impide la entrada de arena y otras sustancias.
- Bujes de goma tipo Goodrich y casquillos de acero inoxidable AISI 304.
- Brida de acople Nema.
- Cuellos de impulsor en acero inoxidable/ NBR. Manchón rígido estriado en acero inoxidable AISI 304.

Diagrama de Dimensiones

- Abastecimiento de agua en hogares y emprendimientos edilicios.
- Sistemas de riego.
- Sistemas anti-incendio.
- Drenaje y desagote en minas.
